

## Inclusive and Secure

We offer a variety of long-term, short-term and flexible booster courses with tried and tested success delivered through live, online lessons.

Core Curriculum is our most popular short-term course consisting of a six week rolling programme that is ideal for addressing immediate needs, thanks to our quick enrolment. Many clients use Core Curriculum as a way of testing how well their students engage with online lessons. This programme offers learners the flexibility of choosing how many subjects they would like to study. Core Curriculum is ideal for bridging gaps in education, for example if learner was going through a fixed term exclusion or has been unable to attend school due to health reasons.

Additionally, we have an extensive selection of long-term accredited courses to choose from including; Functional Skills, GCSEs and A Levels, lasting 1-2 years with various levels and assessments.

## Experienced, Qualified Teachers

All of our learners are in small, live classes studying at a similar pace and ability. Coupled with trained teachers and well-paced online lessons; our learners receive more attention from their teachers and can therefore progress quicker. Furthermore, our learners can interact verbally through the mic in their headset, through public text chat or privately text chat just the teacher.
